50 paired training-company perturbations per year | termination, 12 months
Absolute SD alone is not evidence of improved ranking or explanation stability
Probability SD (percentage points) (lower better)
Strength 0
Strength 10
Strength 18
SD / between-company dispersion (lower better)
Median rank correlation (higher better)
Mean Top-20% Jaccard (higher better)
Common pair-function correlation (higher better)
Relative pair-function difference (lower better)
